To determine tier for net pricing, multiply the quantity by the GSA Net price:

- If the total is less than \$10,000, use GSA Net price (multiply unit List Price by 0.4736 to calculate net price per unit)
- If the total is between \$10,000 and \$25,000 use GSA Level 1 Price (multiply unit List Price by 0.4499 to calculate net price per unit)

THE MAGNUSON GROUP ENVIRONMENTAL STATEMENT

MANUFACTURING PRACTICES

Manufacturing Process

The manufacturing process with Slope starts with partially recycled steel. The cold rolled carbon steel is formed and given a paint color with a low emitting powder coating.

All steel is sourced locally, within 95 miles of Magnuson Group's headquarters in Woodridge, IL, where final assembly occurs. Magnuson Group's vendors are carefully selected based on craftsmanship, location and environmental practices among other considerations

MAINTENANCE & USE & DISPOSAL

Cleaning

Slope can be cleaned using a damp cloth and mild non-abrasive cleaner.

Ergonomic

Product is designed for ergonomic use, which will continue to service life.

Recycling

At the end of it's life cycle, Slope can be disassembled and recycled. The body is made primarily of steel, one of the most recycled materials on the planet, and the internal rigid liner is made of plastic, which is also easily recyclable. Receptacle is designed to maximixe recycling rates through design, graphics, and signage placement.

Use magnets (model GNG-MAG-2; containing 2 magnets) to gang VALUTA/SOTARE units together. For each point of contact between adjacent units being ganged together, 2 magnets are required. For example, ganging 3 VALUTA units together would require 2 pairs of ganging magnets.

Place ganging magnets on the inside steel walls of each adjacent unit by removing the internal liners. Position the units together with magnets facing each other to create the greatest pull.

VALUTA units can also be configured with our SOTARE family of receptacles.

VALUTA Secure models have a narrower 1/2" wide paper opening with a locking lid for secure document disposal.

KASKAD (CONTRACT #GS-07F-0308W - SIN #337121H)

ADDITIONAL NOTES

Ships via common carrier.

All 20" tall ("M" models) and 36" tall ("H" models) Kaskad planters include 14 1/2" x 26 1/2" polybag(s) that can be filled with pea gravel to add ballast as required, depending on the specific situation [i.e., when using dense/tall plant material, where the units are situated, etc.]. Each polybag, if filled to 50% full with pea gravel, will add approximately 25 pounds of weight to the base. If additional stability is required, floor anchors can be provided upon request for no charge (hardware not included).

All 36" high Kaskad units are shipped to you completely assembled with adjustable glides in place on the base. Also included in the carton are two stabilizer bases that can be used in place of the adjustable glides for additional stability when the units are placed in open areas.

Kaskad's fully enclosed watertight internal liner is 7 3/4" deep and can be removed if it is not being used to contain the plants.

KAS-0936 units and KAS-1836 units utilize two separate internal liners for plants.
